

## ACCELERATOR PANTAQUICK C 100 (BE)

The new technology for more efficiency

With the innovative hardening accelerator for the concrete industry

### THE QUICKER THE BETTER

PANTAQUICK C 100 (BE) saves you time and money. Benefit from the following advantages:

- ▶ Faster construction progress
- ▶ Increased productivity
- ▶ Reduction of costs
- ▶ More efficient use of production capacities
- ▶ Lower energy consumption
- ▶ Contribution to sustainability

**One product – many benefits**

## SAVE TIME AND MONEY WITH PANTAQUICK

Try our highly efficient hardening accelerator PANTAQUICK C 100 (BE)! The innovative admixture has been developed specially to optimise the development of early strength of concrete. The product supports significantly the onset of the setting and hardening process and is suitable for all concrete applications where high early strength developments are of crucial importance for the success of the construction project or work process.

### BENEFIT FROM REDUCED FORMWORK DEMOULDING TIMES

Cut costs and increase profits by demoulding earlier. A maximum reuse of formworks cannot only reduce costs, but also provide the opportunity for an increased productivity and an optimised production cycle.

### ACCELERATE THE CONSTRUCTION PROGRESS

PANTAQUICK accelerates the construction progress on site. Formwork can be removed earlier and concreted areas can be loaded earlier. As a result, the entire construction process is sped up.

### OPTIMISE YOUR ECONOMIC EFFICIENCY

PANTAQUICK accelerates the hydration of the cement and thus the setting of the concrete. Formwork demoulding times are reduced leading to an increased productivity and providing the opportunity for a flexible adaptation of plant capacity.

### REDUCE YOUR ENERGY CONSUMPTION

Optimise your energy balance and make a contribution to sustainability by using PANTAQUICK! Even at low ambient and curing temperatures our accelerator achieves a high early strength.

### SAVE COST

Reducing your energy consumption benefits not only the environment. Also your wallet will thank you for it!
